FINAL REJECTION

Response to Arguments

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Drawings

The drawings were received on July 10, 2008. These drawings are acceptable.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 6, examiner notes that the claim appears to be close-ended since applicant uses the term "consists of", however the term "and optionally" appears to contradict the "consists of". Further, the phrase "and optionally" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

Art Unit: 1615

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 3

Claims 1, 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al. (WO 01/87276) in view of Brantl et al. (US 4,826,686) and further in view of McQuinn (US 5,113,860).

With respect to claims 1 and 6, Kim et al. discloses a transmucosal patch containing fentanyl for transmucosal delivery, which comprises a drug layer containing fentanyl, an adhesive (maleic anhydride/vinyl ether copolymer) and thickener (hydroxyethyl cellulose) (pg. 10, lines 18-30). Kim et al. further discloses in Fig. 1, an impenetrable support layer (1) on the drug layer, however fails to expressly disclose the inclusion of a backing layer. However, it is well known in the art to include a backing on a support layer, as taught by Brantl et al. (col. 4, lines 13-17). It would have been obvious to one of ordinary skill in the art to include a backing layer in order to protect the patch from substantial disintegration over the time period which the patch is intended to remain adhered to the mucosal surface, as taught by McQuinn (col. 9, lines 5-12).

With respect to claim 4, the modified Kim et al. fails to expressly disclose the ratio of the adhesive and thickener being in the exact claimed range, however does disclose the adhesive being in the range of 0.1-15wt.% and the thickener being in the range of 0.1-20 wt.% (pg. 10, lines 20-23). Therefore, one of ordinary skill in the art

could attain the ratio in the range of 5:95 to 97:3. It would have been obvious to one of ordinary skill in the art to modify the ratio of adhesive to thickener of the modified Kim in order to attain a patch with desired properties (pg. 10, lines 22-30). Further, it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or working ranges involves only routine skill in the art. In re Aller, USPQ 233.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al. in view of Brantl et al. and further in view of McQuinn and further in view of Yamaguchi et al. (US 5,820,877).

With respect to claim 2, the modified Kim et al. addresses all the limitations of claim 1, however fails to expressly disclose the fentanyl salt is fentanyl citrate.

Yamaguchi et al. discloses a permucosal patch for delivering fentanyl citrate (col. 3, lines 59-60). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the fentanyl salt to be fentanyl citrate, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al. in view of Brantl et al. and further in view of McQuinn and further in view of Miller, II et al. (US 2004/0086551).

With respect to claim 3, the modified Kim et al. addresses all the limitations of claim 1, however fails to expressly disclose the drug release rate from the drug layer is 50% within one hour. Miller, II et al. teaches a fentanyl patch having a drug release rate of 50% within one hour, as illustrated in Figs. 4 and 5. It would have been obvious to one of ordinary skill in the art to modify the drug release rate, as desired, in order to provide an effective immediate release of drug from the patch.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over

Kim et al. in view of Brantl et al. and further in view of McQuinn and further in view of

Yamaguchi et al. and further in view of Miller, II et al.

With respect to claim 5, the modified Kim et al. addresses all the limitations of claims 1 and 2, however fails to expressly disclose the drug release rate from the drug layer is 50% within one hour. Miller, II et al. teaches a fentanyl patch having a drug release rate of 50% within one hour, as illustrated in Figs. 4 and 5. It would have been obvious to one of ordinary skill in the art to modify the drug release rate, as desired, in order to provide an effective immediate release of drug from the patch.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/524,024 Page 6

Art Unit: 1615

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Telephone/Fax Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suezu Ellis whose telephone number is (571) 272-2868. The examiner can normally be reached on 8:30am-5pm (Monday-Friday).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward can be reached on (571) 272-8373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
